Opportunities for Prisoners

National Library of Public Information (NLPI) has conducted the eReading@Your Library Program since 2012 to provide residents in remote areas free access to computers and the Internet through 42 township libraries.

Donghe Township Library of Taitung County, located in the east coast mountain areas of Taiwan, lends 8 tablet PCs to the Taoyuan Skill Training Institute (TSTI), Agency of Corrections, to circulate among prisoners.

The prisoners are learning how to use tablet PCs to read pre-loaded e-books and are interested in the topics on litigation and health.

As an example of the success of the TSTI, other Institutes in other countries are planning to provide similar services.
