Asking Real Librarians

OUR STRUGGLES

Limitations of Predictive
Smart Chatbots:

- Can't handle complex questions
- Fixed, robotic answers
- Limited response scope
- Can't meet social needs

GENERATIVE AI ADVANTAGES

Human-like Thinking & Interaction:

- Understands open-ended
questions & intent
- Gives personalized answers
- Chats flexibly with readers

IMPLEMENTATION GOALS

- Boosts library efficiency
- Cool tech for everyone
- More human-like
interaction

TECHNOLOGY & RESOURCES

AI Image Generation

Speech Recognition System
Speech-to-Text (STT)

Text-to-Speech (TTS)

ChatGPT-4o

Core Technologies:

- Large Language Model (LLM)
- Retrieval-Augmented Generation (RAG)
- Database setup and regular updates
(e.g., book data, library policies,
character profiles)

Info Services
